DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, claims 1-32 and 50-73, in the reply filed on 07/27/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Upon further consideration, the elected Group I is further restricted as follow:

This application contains claims directed to the following patentably distinct species of the claimed invention: Group IA, claims 1-20, is directed to a species of lens assembly comprising, in order from the object side to an image side, a first lens, a first meniscus lens, a second meniscus lens, an aperture stop, a fourth lens, a bi-convex lens; Group IB, claims 21-32, is directed to a species of lens assembly adapted to provide a field of view, vignetting, and distortion of the image; Group IC, claims 50-66, is directed to a species of lens assembly wherein the first parameter of the first lens arrangement may be changed while maintaining the parameters of the second lens arrangement within a desired range so that the image characteristic is maintained within the range of acceptable image characteristics; Group ID, claims 67-73, is directed to a lens assembly wherein each lens element having a lens surface defined by a radius of curvature, a thickness, an index of refraction, and a dispersion, wherein the lens assembly satisfies at least one of the claimed conditions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Neil P. Ferraro on 10/12/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Dinh whose telephone number is 571-272-2327. The examiner can normally be reached on M-F (9:30 AM - 6:00 PM).
